MANILA (AP) — Hilary Clinton will have to win the last two primaries in the Philippines to become the first woman to lead a major US political party.

Cash aid for 4M families

P500 subsidy to help lifeline consumers

By Dennis G. Bordon

FOUR MILLION "LIFELINE USERS," OR FAMILIES consuming less than 100 kilowatt hours of electricity monthly, are expected to receive a subsidy of P500 to help them pay their power bills.

President Macapagal-Arroyo launched his Lifeline power program to ensure electricity to low-income households, including one for the people's "lifeline" of electricity. The P500 cash subsidy will be paid to the government but will be used to offset the cost of electricity for the poor.

While the cash grant of P500 is a good start, critics say the cost of electricity is still too high for the poor. They also say the government should do more to reduce the cost of electricity.

"We are not alone in this. In other parts of the world, the cost of electricity is also high. We need to find ways to reduce the cost of electricity for the poor," said a government official.

OF 4M IN THE PHILIPPINES, THE LARGEST AGRI-CULTURAL SECTOR, MORE THAN 2M ARE RURAL. THEY ARE THE MOST VULNERABLE TO THE HIGH COST OF RICE.

GMA certifies bill extending CARP as urgent

By Cynthia B. Ramos

Manila, June 4 (AP) — The Senate has passed a bill to extend the Comprehensive Agrarian Reform Program (CARP) for another 10 years.

The bill, which was passed by a 12-1 vote, would extend the program until 2018. It also provides for the creation of a new agency to oversee the program.

The bill was passed by a 12-1 vote. It also provides for the creation of a new agency to oversee the program.

Power returns to AFP museum

By Mike Ryan

Power was restored to the AFP Museum in Baguio today after a power outage that lasted for several hours. The museum is a major attraction in Baguio and is a popular destination for tourists. The power outage was caused by a fault in the power lines that supply the museum. The power was restored by the Baguio Electric Company.

During the power outage, the museum was closed to the public. The power was restored at 10:30 a.m. today.

The Department of Social Services (DSS) has filed a petition with the Commission on Elections (COMELEC) to lower the rates of the Social Security System (SSS) for its members. The petition is based on the fact that the SSS rates are too high for the majority of its members, who are mostly low-income earners. The DSS is requesting the COMELEC to lower the rates to a level that is affordable for the majority of its members.

OPINION

Truffling in misery

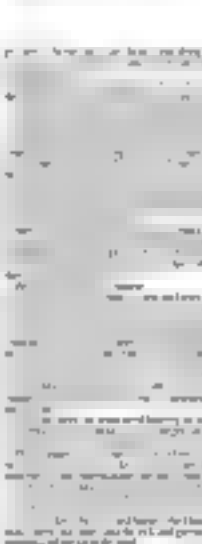

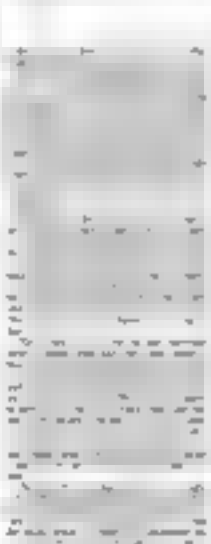

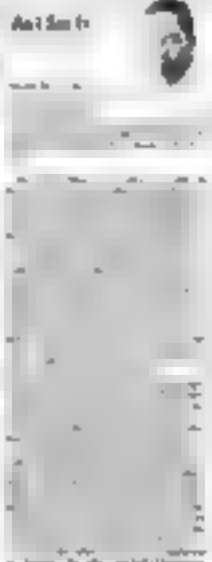

CAMRIDE, the 1994-1995 World Bank report on the state of the Philippine economy, is a sobering document. It says that the Philippine economy is in a state of "prolonged stagnation" and that the country is "one of the poorest in the world." The report also says that the Philippine government is "inefficient and corrupt" and that the country is "in need of fundamental reforms." The report is a wake-up call for the Philippine government and the Philippine people. It is a call for action. It is a call for change. It is a call for a better future.

The report also says that the Philippine government is "inefficient and corrupt" and that the country is "in need of fundamental reforms." Figure 1 is a schematic representation of the experimental design. It shows a flow from 'Pretest' to 'Main Experiment' and then to 'Posttest'. The 'Main Experiment' section includes a 'Pretest' and a 'Main Experiment'.

Figure 1 displays a 4x4 grid of 16 small grayscale images. Each image shows a different pattern or texture, likely generated by a generative model. The patterns vary significantly, including abstract shapes, textures, and some that resemble natural phenomena like clouds or water. The images are arranged in a 4x4 grid, with each image showing a different pattern or texture.

Figure 1 is a line graph showing the effect of the concentration of the inhibitor on the rate of polymerization. The y-axis is labeled "Rate of polymerization" and ranges from 0 to 1.0. The x-axis is labeled "Concentration of inhibitor" and ranges from 0 to 1.0. The curve starts at (0, 1.0) and decreases as the concentration of inhibitor increases, approaching 0.5 at a concentration of 1.0.

Figure 1 displays a series of 10 grayscale images arranged in two columns of five rows each, illustrating the stages of chick embryo development. The top row shows a single cell, and subsequent rows show increasing complexity and size of the embryo. The bottom row shows a fully formed chick about to hatch from its shell.

Figure 1 illustrates the experimental design, showing a sequence of stages: Pre, Stimulus, Response, and Post. Each stage has a 'No' and 'Yes' branch. The 'Pre' and 'Post' stages are labeled 'No' and 'Yes' respectively. The 'Stimulus' and 'Response' stages are labeled 'No' and 'Yes' respectively. The 'Post' stage is labeled 'No' and 'Yes' respectively. The 'Pre' and 'Post' stages are labeled 'No' and 'Yes' respectively. The 'Stimulus' and 'Response' stages are labeled 'No' and 'Yes' respectively. The 'Post' stage is labeled 'No' and 'Yes' respectively.

Kennedy recovers from brain surgery

US SENATOR JOHN KENNEDY has been discharged from hospital after a successful brain surgery to remove a tumor. The 71-year-old senator, who has been in the Senate since 1985, was admitted to the hospital in January after a fall. He underwent surgery on January 15 and is now recovering at home. Kennedy is expected to return to the Senate in the coming weeks.

SNE technology conference

By **Jeffrey M. Smith**
 SNE technology conference
 The SNE technology conference, which is the largest of its kind in the Philippines, will be held at the Sheraton Manila Hotel on April 10-11. The conference is organized by the SNE Technology Association, a non-profit organization that promotes the use of technology in the Philippines. The conference will feature a variety of speakers, including industry leaders and government officials. The topics to be discussed include the latest in technology, the role of technology in the Philippines, and the challenges facing the technology industry in the Philippines. The conference is expected to attract a large number of attendees, including government officials, industry leaders, and technology enthusiasts.

Mail delivery companies

By **Jeffrey M. Smith**
 Mail delivery companies
 The Philippine Postal Corporation (PPC) is planning to launch a new mail delivery service, which will be operated by private companies. The service is expected to be launched in the near future. The PPC is currently in the process of selecting the companies that will be awarded the contract to operate the service. The service is expected to provide faster and more reliable mail delivery than the current service. The PPC is also planning to launch a new parcel delivery service, which will also be operated by private companies. The service is expected to be launched in the near future. The PPC is currently in the process of selecting the companies that will be awarded the contract to operate the service. The service is expected to provide faster and more reliable parcel delivery than the current service.

Spiral binder legend

By **Jeffrey M. Smith**
 Spiral binder legend
 The Philippine Postal Corporation (PPC) is planning to launch a new spiral binder legend, which will be used to identify mail items. The legend is expected to be launched in the near future. The PPC is currently in the process of selecting the companies that will be awarded the contract to produce the legend. The legend is expected to provide a more efficient and accurate way to identify mail items. The PPC is also planning to launch a new spiral binder legend, which will also be used to identify mail items. The legend is expected to be launched in the near future. The PPC is currently in the process of selecting the companies that will be awarded the contract to produce the legend. BDO completes P10-B fundraising

Biggest issuer of capital notes in local market

By **Steve C. Rios**

BDO has completed its P10-billion fundraising drive, the largest in the local market. The bank, which is the largest issuer of capital notes in the Philippines, has successfully raised the funds through a series of public offerings. The funds will be used to finance the bank's expansion plans and to improve its capital base. The bank's management is pleased with the results of the fundraising drive and expects to continue to raise funds in the future. The bank is also planning to launch a new capital note program, which will be used to raise funds for its expansion plans. The bank is expected to be a major player in the local capital market for the foreseeable future.

IPVt raises capital stock

By **Jeffrey M. Smith**
 IPVt raises capital stock
 The Philippine Virtual Technology (IPVt) has successfully raised capital stock through a public offering. The company, which is a leading provider of virtual technology services in the Philippines, is expected to use the funds to expand its operations and to develop new products. The company's management is pleased with the results of the fundraising drive and expects to continue to raise funds in the future. The company is also planning to launch a new capital stock program, which will be used to raise funds for its expansion plans. The company is expected to be a major player in the virtual technology market for the foreseeable future.

Alcantaras to build 700-MW power plant

By **Jeffrey M. Smith**

Alcantaras is planning to build a 700-MW power plant, which will be used to generate electricity for the company's operations. The plant is expected to be built in the near future. The company is currently in the process of selecting the site for the plant and the companies that will be awarded the contract to build the plant. The plant is expected to provide a more efficient and reliable way to generate electricity than the current plant. The company is also planning to launch a new power plant program, which will be used to generate electricity for its expansion plans. The company is expected to be a major player in the power market for the foreseeable future.

 CebuPac links desk with Armatenis
 The Cebu Pacific Airline (CebuPac) has successfully linked its desk with Armatenis, a leading provider of real estate services in the Philippines. The link is expected to provide a more efficient and reliable way to book flights and real estate services. The airline's management is pleased with the results of the link and expects to continue to expand its services in the future. The airline is also planning to launch a new link program, which will be used to link its desk with other real estate services. The airline is expected to be a major player in the real estate market for the foreseeable future.

Would I have the time and energy for a boyfriend?

...the best way to find out if you're ready for a relationship is to ask yourself if you have the time and energy for a boyfriend. This is a common question for many young women, especially those who are busy with school, work, and other commitments. It's important to consider your own needs and priorities before entering a relationship.

En la actualidad, el 90% de los estudiantes de la Universidad de Chile, en la carrera de Ingeniería Civil, se especializan en la rama de Ingeniería Civil Estructural. Este hecho, a su vez, genera una gran demanda de profesionales en esta rama, lo que a su vez, genera una gran demanda de profesionales en esta rama.

TABLE 1. Summary of the 1996-1997 season for the 1000-hour program. The number of hours for each activity is shown in parentheses. The number of students who completed the program is shown in the last column.

1. The first part of the text discusses the importance of maintaining accurate records of all transactions, including sales, purchases, and expenses. It emphasizes that proper record-keeping is essential for determining the correct amount of tax liability and for defending against potential audits.
